## **New Traffic Pattern for Intersection Improvement Project on Dundee Road and Wheeling Road**

**CHICAGO** – The Illinois Department of Transportation (IDOT) announced that a stage change will take place for the intersection improvement project at Dundee Road (Illinois 68) and McHenry Road/Wheeling Road, in Wheeling, beginning, weather permitting, Wednesday, October 5.

In the new traffic pattern, permanent lane closures will be implemented on westbound Dundee Road (Illinois 68) and northbound McHenry Road. The right lane on eastbound Dundee Road will reopen, but occasional, daytime lane closures may be necessary to complete the remainder of the project. Access to local businesses will remain open.

The scope of the project consists of adding turn lanes on westbound Dundee Road and southbound McHenry Road. The project also will include resurfacing and improvements to the sidewalk, traffic signals and drainage at the intersection.

A new lane configuration is planned for later this fall. The overall project is expected to be completed in Spring 2017.

Motorists can expect delays and should allow extra time for trips through this area. Drivers are urged to pay close attention to flaggers and signs in the work zones, obey the posted speed limits and be on the alert for workers and equipment.
